

Electrical and Computer Engineering

RICHARD LEAHY, PROFESSOR AND CHAIR, ELECTRICAL & COMPUTER ENGINEERING, SYSTEMS

“Welcome to the Ming Hsieh Department of Electrical and Computer Engineering! USC began teaching electrical engineering more than a century ago, when the

field was widely considered a subset of physics. Today our work is vitally important and critical to the advancement of the information age. As our department charges into its second century of excellence, we are defining the forefront of research in a number of important areas. These include: circuits; antenna networks; bio-signal processing; computer architecture; very large-scale integration and computer-aided design; computer networks; control systems; high-speed switching architectures; signal, image and multimedia processing; nanotechnology; optical communications; photonics; and quantum information processing...

We're proud of our department's distinguished history and our vital and innovative faculty. ”

Graduate Programs in Electrical and Computer Engineering
(recorded December 8, 2025)

Master's Programs

Master's Degree Programs	Available On-Campus	Available Online	Availability
Applied Physics	✓		Fall Only
Computer Engineering	✓	✓	Fall/Spring

Master's Degree Programs	Available On-Campus	Available Online	Availability
<u>Electrical and Computer Engineering</u>	✓	✓	Fall/Spring
<u>ECE - Analog, Mixed-Signal, and Radio-Frequency Integrated Circuits</u>	✓		Fall Only
<u>ECE - Computer Architecture</u>	✓		Fall/Spring
<u>ECE - Electric Power</u>	✓	✓	Fall/Spring
<u>ECE - Hardware Systems for Machine Learning</u>	✓		Fall Only
<u>ECE - Machine Learning and Data Science</u>	✓		Fall/Spring
<u>ECE - VLSI Design</u>	✓	✓	Fall/Spring
<u>Financial Engineering</u>	✓	✓	Fall/Spring
<u>Quantum Information Science</u>	✓		Fall Only
<u>Electrical and Computer Engineering / Engineering Management (Dual Degree)</u>	✓	✓	Fall/Spring
