

[ARCHIVED CATALOGUE]

Electrical and Computer Engineering (Analog, Mixed-Signal and Radio-frequency Integrated Circuits) (MS)

The Master of Science in Electrical and Computer Engineering (AMSRFIC) features a comprehensive set of courses related to in analog, mixed-signal, and radiofrequency integrated circuits with a wide range of applications in wireless and wired communications, autonomous systems, machine learning and artificial intelligence, medical electronics, biomedical implants, controls, sensing, and imaging.

Course Requirement: At least seven courses (a minimum of 28 units) must be taken from the following list (combination of core courses and elective courses). At least four courses must be taken from the list of core courses, with the remainder from the list of elective courses or (with program adviser approval) from the list of core courses or directed research ([EE 590](#)).

Core Requirements

- [EE 505 Analog, Mixed-Signal, and RF Integrated-Circuit Tape-Out](#) Units: 4
- [EE 536a Analog Integrated Circuits](#) Units: 4
- [EE 536b Analog Integrated Circuits](#) Units: 4
- [EE 631 Mixed-Signal Integrated Circuits](#) Units: 4
- [EE 632a Integrated Communication Systems](#) Units: 4
- [EE 632b Integrated Communication Systems](#) Units: 4

Elective Courses

- [EE 537 Modern Solid-State Devices](#) Units: 4
 - [EE 576 Integrated Memory Devices and Technologies](#) Units: 4
 - [EE 577a VLSI System Design](#) Units: 4
 - [EE 577b VLSI System Design](#) Units: 4
-
